RELIABILITY YOU CAN BUILD ON.

ABOUT VINE EARTHWORKS

Who We Are & What We Stand For

Vine Earthworks Glass & Aluminium Works is a full-spectrum construction services company based in Nairobi, Kenya. We combine heavy earthworks capability — excavation, grading, and site preparation — with specialist glass, aluminium fabrication, and stainless-steel finishing. This unique combination means we can partner with you from raw land clearing all the way through to the final glass and aluminium fit-out of your building. Our team of experienced operators, glaziers, and fabricators are committed to quality, safety, and on-time delivery on every project we undertake. Built on Solid Ground. If you are looking for the redefinition of excellence well you are in luck because at vine earthworks we provide you with excellence in the making. Weather it's with your home interior or even the exterior making we at vine earthworks are determined to make that which you dream of into a reality. Some people see dirt and rocks. We see future homes, roads, offices, and opportunities waiting to happen. At Vine Earthworks, we combine skill, technology, and hard work to deliver professional earthmoving solutions that create strong foundations for every project. We handle the heavy lifting so our clients can focus on building the future, preferably without their shoes sinking into mud.

Vine Earthworks Glass & Aluminium

From concept to creation, We Deliver

PART ONE

EARTHWORKS & CONSTRUCTION SERVICES

Six comprehensive earthmoving and construction services.

01

EXCAVATION & DUMPING

Site Preparation & Earthmoving

Our excavation and dumping service provides comprehensive site preparation for construction projects of all scales. Using modern hydraulic excavators, we perform precise digging, trenching, and bulk

02

SUPPLY OF BUILDING MATERIALS

Sand · Ballast · Hardcore

We supply quality building materials directly to your construction site, eliminating the hassle of sourcing from multiple vendors. Our materials are carefully screened and graded to meet construction

03

BUSH CLEARING

Vegetation Removal & Land Preparation

We provide professional bush clearing services to prepare raw land for construction, farming, or infrastructure development. Equipped with bulldozers and multi-terrain machines, our team removes trees.

04

ROAD GRADING

Leveling, Smoothing & Road Formation

Our road grading service delivers smooth, well-formed road surfaces using motor graders and compactors. We work on murram roads, access tracks, estate roads, and site haul roads. Proper grading ensure.

05

TRENCH DIGGING*Utility & Drainage Trenching*

Precision trench digging using narrow-bucket excavators and trenching machines for utility installation and drainage works. We achieve clean, consistent trench profiles that reduce bedding material.

06

EXCAVATOR BREAKER*Hydraulic Breaking & Demolition*

The excavator breaker service combines the reach and mobility of a hydraulic excavator with a high-impact breaker attachment. This allows us to demolish concrete structures, break up rock formations.

SERVICE 01

EXCAVATION & DUMPING*Site Preparation & Earthmoving***VINE EARTHWORKS**vineearthworks.co.ke

Our excavation and dumping service provides comprehensive site preparation for construction projects of all scales. Using modern hydraulic excavators, we perform precise digging, trenching, and bulk earthmoving. We handle full excavation cycles — from initial topsoil stripping and bulk cut to structured dumping at approved sites. Our machinery fleet includes long-reach and standard excavators, ensuring we can access confined or deep sites effectively. We work closely with site engineers and project managers to ensure excavation depths, batter slopes, and material handling meet project specifications.

WHAT WE DO

- Hydraulic excavation for foundations, basements, and roads
- Bulk earthmoving and cut-and-fill operations
- Controlled dumping at designated waste sites
- Rock and hard soil excavation with breaker attachments
- Slope trimming and embankment formation
- Loading and haulage of excavated material

IDEAL FOR

Residential foundations, commercial basements, infrastructure corridors, dam construction, and any large-scale earthmoving project requiring precision and speed.

SERVICE 02

SUPPLY OF BUILDING MATERIALS

Sand · Ballast · Hardcore

VINE EARTHWORKS

vineearthworks.co.ke

We supply quality building materials directly to your construction site, eliminating the hassle of sourcing from multiple vendors. Our materials are carefully screened and graded to meet construction standards. We operate a fleet of trucks to ensure timely, bulk delivery regardless of site location within and around Nairobi. Consistency in material quality is our commitment on every order. Our sourcing network ensures we can meet large volume demands without delay, and our delivery scheduling fits around your construction programme.

WHAT WE DO

- River sand and sharp sand for concrete mixing and plastering
- Crushed ballast (14mm, 20mm, 40mm) for concrete and drainage
- Hardcore for sub-base preparation and hardcore filling
- Murram for road formation and embankment fills
- Bulk delivery using tipper trucks in various load sizes
- Scheduled repeat deliveries for ongoing projects

IDEAL FOR

Contractors, private builders, road projects, and large commercial developments needing reliable, on-schedule material supply.

SERVICE 03

BUSH CLEARING

Vegetation Removal & Land Preparation

VINE EARTHWORKS

vineearthworks.co.ke

We provide professional bush clearing services to prepare raw land for construction, farming, or infrastructure development. Equipped with bulldozers and multi-terrain machines, our team removes trees, shrubs, stumps, and dense vegetation efficiently. We also handle removal of cleared debris and can reshape land contours to your specification. Safety and minimal disturbance to adjacent areas is prioritized throughout every clearing operation. We are experienced in working in tight timelines to unblock construction programme start dates.

WHAT WE DO

- Full vegetation clearing — grass, shrubs, and dense bush
- Tree felling and stump grubbing using bulldozers

IDEAL FOR

Raw land development, agricultural preparation, estate development, road corridors, and infrastructure projects requiring cleared, workable ground.

- Debris collection and disposal or on-site burning where permitted
- Land leveling and rough grading after clearing
- Boundary clearing and buffer zone maintenance
- Slope stabilization and erosion prevention post-clearing

SERVICE 04

ROAD GRADING

Leveling, Smoothing & Road Formation

VINE EARTHWORKS

vineearthworks.co.ke

Our road grading service delivers smooth, well-formed road surfaces using motor graders and compactors. We work on murram roads, access tracks, estate roads, and site haul roads. Proper grading ensures drainage, reduces vehicle wear, and extends road life. We also carry out re-grading of existing roads that have developed potholes, ruts, or erosion channels, restoring them to a safe and functional standard. Our operators understand the importance of correct cross-fall to prevent pooling and road deterioration.

WHAT WE DO

- Motor grader leveling for new road formation
- Re-grading of existing murram and earth roads
- Cross-fall and camber setting for proper drainage
- Compaction using vibrating rollers for durability
- Pothole filling and road surface restoration
- Haul road maintenance for active construction sites

IDEAL FOR

Estate developers, county governments, farms, quarries, and construction site access road formation and maintenance.

SERVICE 05

TRENCH DIGGING

Utility & Drainage Trenching

VINE EARTHWORKS

vineearthworks.co.ke

Precision trench digging using narrow-bucket excavators and trenching machines for utility installation and drainage works. We achieve clean, consistent trench profiles that reduce bedding material waste and speed up pipe-laying. Our team follows safety protocols including shoring in deep trenches and

traffic management on road-side works. We handle reinstatement of trenched areas to original or improved standards upon completion. Our team coordinates closely with utility engineers to achieve correct trench geometry.

WHAT WE DO

- Narrow trench digging for water, sewer, and gas lines
- Cable and fiber optic duct trenching
- Stormwater and drainage channel excavation
- Trench shoring and collapse prevention in soft ground
- Pipe-zone bedding and backfilling operations
- Road surface reinstatement after trench works

IDEAL FOR

Water utilities, telecom contractors, drainage engineers, road authorities, and developers needing precise utility corridor excavation.

SERVICE 06

EXCAVATOR BREAKER

Hydraulic Breaking & Demolition

VINE EARTHWORKS

vineearthworks.co.ke

The excavator breaker service combines the reach and mobility of a hydraulic excavator with a high-impact breaker attachment. This allows us to demolish concrete structures, break up rock formations, and split hard ground that standard excavators cannot penetrate. It is the fastest and most cost-effective method for breaking hard surfaces on site. Our operators are trained to work safely near structures, services, and in confined areas, making selective demolition achievable with minimal impact on surrounding elements.

WHAT WE DO

- Breaking reinforced concrete slabs, beams, and walls
- Rock breaking for foundation excavation in rocky terrain
- Demolition of old structures — floors, walls, and columns
- Breaking hard laterite and murram layers
- Selective demolition without disturbing adjacent structures
- Debris sizing for easier loading and disposal

IDEAL FOR

Rocky construction sites, demolition projects, road reconstruction, quarry preparation, and any project where standard excavation is insufficient.

At Vine Earthworks, we believe every successful project begins with a strong and carefully prepared foundation. Through precision, professionalism, and modern equipment, we transform raw land into safe, functional, and development-ready spaces. Our commitment to quality workmanship and timely delivery ensures that every project is completed to the highest standards, creating the groundwork for lasting structures and future growth.

Our mission is to deliver exceptional earthworks solutions that combine strength, precision, and innovation. From land clearing and excavation to grading and site preparation, we approach every project with integrity and excellence. By turning challenging terrain into productive and usable spaces, we help bring visions, developments, and communities to life

TURNING YOUR DREAM TO A REALITY

GLASS & ALUMINIUM WORKS

Eight specialist glazing and aluminium fabrication services.

01

GLASS SUPPLY

Quality Glass Panels Delivered to Site

At Vine Earthworks Glass & Aluminium, we specialize in the supply of high-quality glass solutions designed to combine durability, elegance, and modern architectural appeal. We provide a wide range of glass products suitable for residential, commercial, and industrial applications, carefully selected to meet the highest standards of strength, clarity, and performance.

02

GLASS FITTING

Professional Installation by Skilled Glaziers

Vine Earthworks Glass & Aluminium offers professional glass fitting services designed to bring elegance, durability, and modern style to every space. We specialize in the installation of office partitions, aluminium windows, glass doors, shower cubicles, shopfronts, mirrors, balustrades, and customized glass solutions for both residential and commercial projects

03

ALUMINIUM WINDOWS & DOORS

Sleek Frames for Modern Architecture

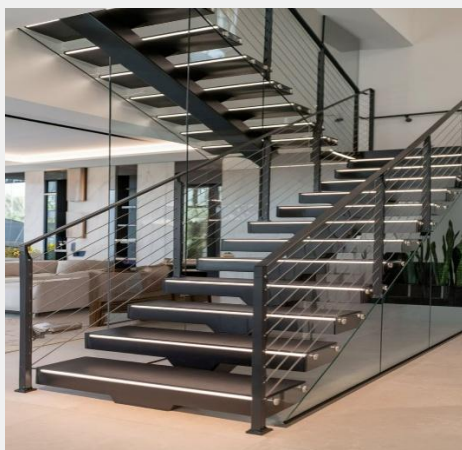

We design, fabricate, and install aluminium window and door systems for residential and commercial properties. Aluminium offers superior strength-to-weight ratio, corrosion resistance, and low maintenance.

04

STAINLESS STEEL STAIRCASE

Handrails, Balustrades & Stair Structures

Vine Earthworks Glass & Aluminium offers premium stainless steel staircase solutions designed to combine strength, safety, and modern architectural elegance.

7

FRAMELESS DOORS*Elegant Glass Doors for Offices & Homes*

Vine Earthworks Glass & Aluminium specializes in the supply and installation of premium frameless glass doors designed to give spaces a sleek, modern, and sophisticated appearance. Crafted with high-quality toughened glass and precision fittings, our frameless doors are ideal for offices, commercial spaces, homes, shopfronts, and interior partitions where elegance and openness are essential.

08

SHOWER CUBICLES*Frameless & Semi-Frameless Shower Enclosures*

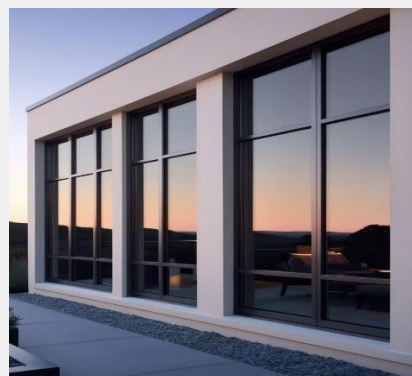

Vine Earthworks Glass & Aluminium provides modern and stylish shower cubicle solutions designed to enhance comfort, elegance, and functionality in bathrooms of all sizes. Our shower cubicles are crafted using high-quality toughened glass and durable fittings to create sleek, waterproof, and easy-to-maintain enclosures that bring a luxurious touch to residential and commercial spaces alike.

05

BALCONY*Glass & Aluminium Balcony Systems*

We design and install balcony railing and enclosure systems using a combination of glass, aluminium, and stainless steel. Our balcony solutions enhance safety, maximize views, and add architectural touch.

06

CURTAIN WALL*Full-Facade Glazing Systems*

Curtain wall systems provide a non-structural outer covering of a building using glass and aluminium framing. We supply and install stick-built and unitized curtain wall systems that deliver both class and excellence.

SERVICE 01

GLASS SUPPLY

Quality Glass Panels Delivered to Site

VINE EARTHWORKS

We supply a comprehensive range of glass types to contractors, architects, and builders across Nairobi and beyond. Our stock includes clear float glass, tinted glass, tempered safety glass, laminated glass, and frosted glass in various thicknesses. All glass is carefully packed and delivered using padded transportation to prevent breakage. We can advise on the right glass specification for your project — whether structural, decorative, or thermal. Our supply chain ensures consistent availability and fast turnaround times even on large orders.

WHAT WE DO

- Clear float glass (3mm to 19mm thickness)
- Toughened/tempered safety glass for doors and shower screens
- Laminated glass for enhanced security and sound reduction
- Tinted and reflective glass for facades and curtain walls
- Frosted and patterned glass for privacy applications
- Insulated glazing units (double-glazing) for thermal efficiency

IDEAL FOR

Contractors, glaziers, interior designers, and building owners requiring reliable glass supply with consistent quality and on-time delivery.

SERVICE 02

GLASS FITTING

Professional Installation by Skilled Glaziers

VINE EARTHWORKS

Our glazing installation team handles the precise fitting of glass panels in windows, doors, partitions, facades, and shopfronts. We use professional-grade tools and industry-standard sealants to ensure watertight, long-lasting installations. Every installation is measured on site, cut to exact dimensions, and fitted with appropriate hardware. We work on both new builds and retrofit/replacement projects with minimal disruption to occupants. Our glaziers are experienced in commercial, residential, and industrial settings.

WHAT WE DO

- Window glass replacement and new window glazing
- Shopfront and commercial facade glass installation
- Structural glass partition fitting in offices and homes
- Sealed unit replacement in double-glazed windows

IDEAL FOR

Commercial refurbishments, residential builds, retail fit-outs, and any project requiring precise, professional glass installation.

- Emergency glass replacement for broken panes
- Silicon sealing, gasket fitting, and weatherproofing

SERVICE 03

ALUMINIUM WINDOWS & DOORS

Sleek Frames for Modern Architecture

VINE EARTHWORKS

We design, fabricate, and install aluminium window and door systems for residential and commercial properties. Aluminium offers superior strength-to-weight ratio, corrosion resistance, and low maintenance — ideal for Kenya's climate. Our range includes casement windows, sliding windows, louvre windows, bi-fold doors, and sliding doors. Frames are powder-coated in a wide range of colors and finishes to match your design vision. Our in-house fabrication workshop allows us to produce custom sizes with short lead times.

WHAT WE DO

- Casement, sliding, and awning aluminium window frames
- Aluminium bi-fold, sliding, and hinged door systems
- Louvre windows for natural ventilation control
- Powder coating in custom RAL colors and anodized finishes
- Insect mesh fitting and security grille integration
- Full supply, fabrication, and installation service

IDEAL FOR

Housing estates, offices, hotels, schools, and commercial buildings requiring durable, attractive, low-maintenance window and door solutions.

SERVICE 04

STAINLESS STAIRCASE

Handrails, Balustrades & Stair Structures

VINE EARTHWORKS

We fabricate and install premium stainless-steel staircases, handrails, and balustrade systems. Stainless steel combines elegance with durability — resistant to corrosion, easy to clean, and visually striking. We offer custom design to suit the architecture of your building, from sweeping curved staircases to clean straight-run designs. Glass infill panels can be incorporated into balustrades for a contemporary, open feel. All fabrication is done to precise engineering drawings and structural specifications.

WHAT WE DO

- Stainless steel handrails and balustrade systems (Grade 304 & 316)
- Full staircase fabrication — stringers, treads, and landings
- Glass-filled balustrades for staircases and mezzanines
- Post-and-cable railing systems for open, modern aesthetics
- Welding, polishing, and mirror/satin finishing
- On-site installation with structural fixings

IDEAL FOR

Apartments, offices, malls, hotels, and luxury homes where safety, aesthetics, and durability are equally important.

SERVICE 05

BALCONY

Glass & Aluminium Balcony Systems

VINE EARTHWORKS

We design and install balcony railing and enclosure systems using a combination of glass, aluminium, and stainless steel. Our balcony solutions enhance safety, maximize views, and add architectural character to residential and commercial buildings. Whether you want a fully glazed balustrade for panoramic views or a solid aluminium panel system for privacy, we deliver to specification. All balcony work is structurally sound and compliant with local building regulations, with fixings engineered for the specific slab and structural system.

WHAT WE DO

- Frameless and semi-frameless glass balustrades
- Aluminium post-and-rail balcony systems
- Balcony enclosures with sliding or fixed glass panels
- Juliet balconies with glass or stainless balustrades
- Waterproofing and drainage integration for balcony floors
- Structural assessment and anchor installation

IDEAL FOR

Apartments, townhouses, hotels, and commercial buildings with outdoor terraces requiring safe, beautiful, long-lasting balcony solutions.

Curtain wall systems provide a non-structural outer covering of a building using glass and aluminium framing. We supply and install stick-built and unitized curtain wall systems that deliver thermal performance, weather resistance, and a powerful architectural presence. Our team works with architects and structural engineers to ensure the system meets wind load, acoustic, and energy efficiency requirements. Curtain walling transforms commercial buildings into modern, light-filled workplaces that make a bold first impression.

WHAT WE DO

- Stick-built aluminium curtain wall systems
- Unitized panel curtain wall for high-rise construction
- Structural silicone glazing and point-fixed glass facades
- Spandrel panel integration and fire-stop detailing
- Thermal break aluminium profiles for energy efficiency
- Project management from design to installation

IDEAL FOR

Office towers, hotels, hospitals, shopping malls, and government buildings requiring high-performance, architecturally striking facade glazing.

Our frameless glass doors create a seamless, sophisticated entrance for offices, hotels, showrooms, and residences. Using 10mm or 12mm toughened glass with polished stainless fittings, these doors are both beautiful and robust. Pivot, swing, and sliding configurations are available to suit any opening. Hardware options include floor springs, patch fittings, pull handles, and electronic access control integration. We carry out full site measurement, custom fabrication, and precise installation as part of every project.

WHAT WE DO

- Single and double frameless glass swing doors
- Frameless glass sliding and bi-fold door systems
- Pivot doors with concealed floor spring mechanisms

IDEAL FOR

Offices, hotels, banks, retail stores, and conference centers where a premium, contemporary entrance statement is desired.

- Patch fittings and polished stainless patch hardware
- Access control and automatic door operator integration
- Custom sandblasting and manifestation for branding or privacy

SERVICE 08

SHOWER CUBICLES

Frameless & Semi-Frameless Shower Enclosures

VINE EARTHWORKS

We design and install bespoke shower cubicles using toughened safety glass and premium stainless or chrome hardware. Frameless shower enclosures eliminate visible frame profiles for a clean, luxurious finish that is easy to clean and maintain. We offer custom sizes to fit any bathroom layout, with door configurations including pivot, hinged, and sliding options. All shower installations include watertight sealing and quality hardware guaranteed for durability. Our installations come with a workmanship warranty for complete peace of mind.

WHAT WE DO

- Fully frameless shower enclosures (8mm & 10mm tempered glass)
- Semi-frameless shower doors with minimal aluminium framing
- Walk-in shower panels and fixed screens
- Custom-size fabrication to fit any bathroom layout
- Chrome, brushed nickel, and matte black hardware options
- Complete installation including sealing, channels, and hinges

IDEAL FOR

Residential bathrooms, hotel rooms, gyms, and spas requiring a premium, hygienic, low-maintenance shower enclosure solution.
